I'm a self motivated team player with a can-do attitude. I have an extensive background in accounting, but am making the switch to development. I love being challenged by logic statements and math. I have found that excitement again with coding. I love the perpetual challenges that I'm faced with on each new project. I have excellent time management skills and 2+ years of experience working remote with a team to meet deadlines.

EXPERIENCE

Vivint Smart Home, Provo — *Staff Accountant*

June 2014 - PRESENT

- Worked with dev to create new reports and reconciliations for revenue.
- Migrate fixed assets to a new accounting system in 2017 and verify the accuracy of the migration.
- Logically processed out our asset review process to better function with our entries into our SAP system.
- Regularly work in a project environment to track completion and spend of CAPEX projects.
- Work with internal audit to regularly test processes ensuring accuracy and that controls are implemented correctly.

Accelerated Payment Technologies, Pleasant Grove —*Staff Accountant*

March 2011 - May 2014

- Work with sales to develop more streamlined hardware ordering process.
- Calculate commissions for hardware.
- Work with multiple departments to process expense reports and employee reimbursements.
